# **ARIZONA HIGHWAY USER REVENUE FUND**

## **OFFICIAL FORECAST UPDATE**

### **RISK ANALYSIS OF EXPECTED VALUES**

#### **Introduction**

This document presents the forecast of expected values for the Arizona Highway User Revenue Fund for the period FY 2008-2017, as prepared by the Arizona Department of Transportation.

#### **Background**

The State of Arizona taxes motor fuels and collects a variety of fees relating to the registration and operation of motor vehicles in the state. These collections include gasoline and use fuel taxes, motor carrier fees, vehicle license taxes, motor vehicle registration fees, and other miscellaneous fees. These revenues are deposited in the Arizona Highway User Revenue Fund (HURF) and are then distributed to the cities, towns and counties of the State and to the State Highway Fund, which is administered by the Department. These taxes and fees represent the primary source of revenues available to the state for highway construction, improvements and other related expenses.

Since 1986, the Department has estimated Highway Revenues for the State using a comprehensive regression-based econometric model. In 1989, the model was updated by Dr. Alberta Charney of the University of Arizona. The model relied on the estimates of certain "independent variables" to predict future tax revenues. The model's revenue forecast was highly dependent on estimates of the independent variables. Any variability between estimated and actual values could lead to variances in the tax forecast. In order to deal with this variability, the Department introduced the Risk Analysis Process (RAP) in 1992. The RAP relies upon probability analysis and the independent evaluation of the model's variables by an expert panel of economists. This results in a series of forecasts with specified probabilities of occurrence, rather than a single or "best guess" estimate.

In 1997, Hickling Lewis Brod Inc. (HLB), working in conjunction with Dr. Dennis Hoffman of Arizona State University, developed a new forecasting model to incorporate certain economic data generated over the past ten years and evaluate the inclusion of independent variables absent from the 1989 model, to enhance the model's forecasting accuracy. HLB also eliminated independent variables that were either not significant to the model or were not readily available. The new model also took into consideration 1997 legislation which eliminated the weight distance tax on motor carriers, increased weight and use fees for use class vehicles, and changed the point of taxation on fuel. In September 2000 and 2003, HLB reviewed the model and updated the equations. The independent variables contained in the model in 2003 included Arizona Real Income Growth Per Capita, Population Growth, Wage & Salary Employment Growth and Fleet Fuel Efficiency.

In 2005, HDR\HLB developed a new forecasting model to incorporate additional economic data that would enhance the model's forecasting accuracy. The Arizona Real Gross State Product independent variable was added to the model to incorporate the impact of the Arizona economy on the commercial registration activities. The independent variables contained in the updated model now include:

- Arizona real income growth per capita
- Arizona population growth
- Arizona wage & salary employment growth
- Arizona real gross state product
- Arizona fleet fuel efficiency

### **Risk Analysis Panel**

The Risk Analysis Process relies heavily on the judgments of an expert panel of economic and financial participants to provide information critical to the forecasting process. In August 2007, a panel of twelve economic and finance experts representing public, private, and academic sectors submitted their individual estimates of the model's independent variables and comments on the future economic outlook.

The information gathered from the panelists was input into the model to produce a series of forecasts with associated probabilities of occurrence. The panelists' inputs are reflected in the attached tables at the back of this report.

### **Model Results**

This year's panel inputs produced a mean forecast of \$18,605.1 million for the period FY 2008-2017 with a compound growth rate of 5.4 percent.

The Department's Official Forecast for FY 2008-2017 totals \$18,159.5 million with a compound growth rate of 5.1 percent. The Official Forecast incorporates the 50 percent confidence interval for each year of the forecast. The FY 2008 forecast of \$1,440.2 million was developed in July 2007 by ADOT staff using time-series techniques, historical and projected growth rates from the model, and recent legislative changes.

### Summary

The Department's Official Forecast for FY 2008-2017 totals \$18,159.5 million, a decrease of \$200.4 million from the November 2006 Official Forecast. The Risk Analysis Process panel members forecasted lower growth in Arizona Real Per Capita Personal Income and Arizona Wage and Salary Employment throughout the forecast period compared to their September 2006 inputs. The RAP panel members became concerned with the housing and credit markets in the short term. However, the panel does expect to see continued economic growth in Arizona, but in the short term, at a somewhat slower pace.

### Supplementary Information

The remaining pages of this report present supplementary information on the detailed results of the Risk Analysis Process, the Department's model and the values of the independent variables forecast by the expert panel. While the Official Forecast period is FY 2008-2017, panel inputs were requested for FY 2008-2012, 2016, 2021 and 2026. Data displayed for other than the requested years, has been extrapolated.

**NOTES:**

FY 2008 HURF estimate based on July 2007 Forecast.

FY 2009-2017 HURF estimate based on September 2007 Official Forecast.

/1. The DPS/ESP includes \$1 million for Economic Strength Project (ESP) each year.

The DPS transfers are assumed at \$10 million each year, but are subject to change.

FY 2008 includes a \$150,000 appropriation to ADOT for a statewide highway hazards assessment study and \$617,000 appropriation (includes ERE) to MVD for the registration compliance program and third party program per Laws 2007, Chapter 255 (HB 2781).

FY 2008 also includes a \$6.7 million appropriation to ADOT/MVD for two new customer service centers and one multipurpose facility per Laws 2007, Chapter 257 (HB 2783).

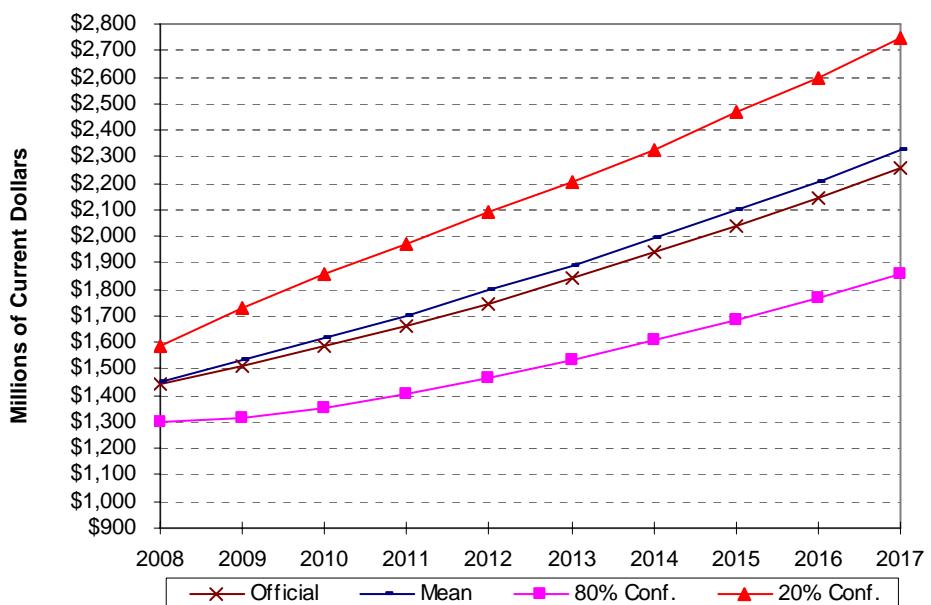

/2. Per Laws 2005, Chapter 306 (SB 1119), 1.51 percent of the state highway fund share of HURF VLT is transferred to the DPS Parity Compensation Fund.

/3 Net of the DPS Parity Compensation Fund.
